TANU KUMARI VISHWAKARMA

Junior Full-Stack Developer | React / Next.js · Python (Django, FastAPI) · AWS

Hazaribagh, Jharkhand, India · +91 9749559370 · tanu63867@gmail.com

Portfolio: tnuislostg.github.io · **GitHub:** github.com/tnuislostg · **LinkedIn:** linkedin.com/in/tanuvishwakarma

SUMMARY

Junior full-stack developer who builds and ships complete web apps: React/Next.js front ends with Python (Django, FastAPI, Flask) back ends, deployed live on Render, Netlify and AWS. Five publicly live projects covering real-time chat over WebSockets, an AI-powered conversation app, a skill-assessment platform, an e-commerce store and my own portfolio site. Comfortable owning a feature end to end: UI, API, database and deployment. Open to remote roles in full-stack, Python, React or cloud. See all my work at tnuislostg.github.io.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Python, SQL, C++
Frontend	React, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend	FastAPI, Django, Flask, Node.js / Express, REST APIs, JWT authentication, WebSockets
Databases	MongoDB, MySQL, Firebase
Cloud & Tools	AWS (EC2, S3, IAM, Lambda), Render, Netlify, Git / GitHub, CI/CD, Postman
Learning now	Advanced SQL, Machine Learning

PROJECTS

TUKO — Real-Time Chat Application

Live demo | Source code

React · Python · FastAPI · WebSockets

- Built a real-time chat app with a React front end connected to a FastAPI back end over WebSockets.
- Integrated an AI assistant into the chat and deployed the app live on Render.

ASALPS — Adaptive Skill Audit & Learning Path System

Live demo | Source code

Django · Python · Bootstrap

- Built a full-stack platform that evaluates a user's competencies and recommends a personalised learning path.
- Deployed the Django application live on Render.

AI Monk — Philosophical Conversation App

Live demo | Source code

Python · Flask · AI API

- Built an AI-powered chat app that keeps multi-turn context across a conversation.
- Used async API calls with robust error handling for failed requests; deployed live on Render.

Cake & Crumb — Bakery E-Commerce Website

Live demo | Source code

React · Tailwind CSS · WhatsApp Business API

- Built a React single-page store with a cake builder that updates the price live and a cart that persists between visits.
- Wired checkout to the WhatsApp Business API and set up automatic deployment on Netlify.

Personal Portfolio Website

Live demo | Source code

Responsive single-page site · HTML · CSS · GitHub Pages

- Designed and built my own portfolio site that presents my projects, tech stack and certifications in one place.
- Responsive on phones and desktops, with a dark glass-style design and no external dependencies; hosted live on GitHub Pages.

CERTIFICATIONS

AWS Cloud Practitioner · **Full Stack Developer Bootcamp** · **Python Programming** · **JavaScript Programming** — all from GeeksforGeeks

EDUCATION

B.A. English — in progress
